Thank you for purchasing the Escali Estilo Spring Scale!

Please read the following operation information to ensure the proper function of your new scale.

INITIAL SETUP

1. Remove the cardboard support from under the load cell.
2. Place the plastic bowl on top of the load cell.
3. Use the tare knob located underneath the scale, to zero out the display.

HOW TO WEIGH

1. Place item gently into the bowl.
2. The weight of the item is displayed in pounds (lbs), and Kilos (kg).

HOW TO USE THE “TARE” FEATURE

This feature allows the display to be zeroed out after you weigh an item in the bowl. It shows the weight of additional items as if you were to weigh them separately.

1. Place the bowl, without the item, gently on the platform.
2. Use the tare knob to adjust to zero.
3. Gently add the item to the bowl; the display will show the weight of the item only.
4. Repeat steps 2, and 3 when adding more items to the bowl.

PROPER USE & CARE

- Use and stow the scale at room temperature.
- Use on a flat, level, and stable surface.
- The scale is an instrument of precision. Do not submit the scale to shaking, excessive vibration or other rough treatment.
- Disassembling, or tampering with the scale voids the warranty.

- Clean the scale with dish soap, and a damp cloth.
- Do not submerge in liquid; the scale is not waterproof.
