

BT601

Ear and Forehead Thermometer

Escali®

Fast. Safe. Reliable.

In-Ear and Non-contact Forehead

The Escali BT601 Ear and Forehead Thermometer provides fast and accurate readings that the whole family can depending on. The visual and audible fever alarm will instantly alert you to both low and high fevers with a color-coded backlit display. Use the non-contact infrared technology to measure in forehead mode, or remove the magnetic probe cover and this smart thermometer will automatically switch into ear mode.

Certified Safe

FDA and CE certifications give you peace of mind that this thermometer is designed with the safety of your family in mind.

Nearly Instant Readings

The advanced infrared technology will take measurements within 1 second.

Fever Alarm

An alert will sound and the large backlit display will change colors when a fever is detected.

Silence When You Need It

Use the mute function to silently check on your child's temperature while they are sleeping.

Object Mode

Measure the surface temperature of solid or liquid objects—like baby's milk—to test for safety.

Temperature Range:

89.6°F to 109.2°F (32°C to 42.9°C)

Body Accuracy: ±0.4°F (±0.2°C)

Measuring Distance: 0-3 cm

Response Time: >1 second

Display Resolution: 0.1°F (0.1°C)

Memory: Up to 40 measurements

Batteries: Two AAA (included)
